Profile Summary

Final-year B.Tech Computer Science & Engineering student with strong fundamentals in **Core Java, Object-Oriented Programming, DBMS, and SQL**. Hands-on experience in developing **Java-based applications, API-driven web projects, and embedded system solutions**. Seeking an entry-level software engineering role through campus placement to apply problem-solving and development skills.

Education

Institute of Technical Education and Research, SOA University <i>Bachelor of Technology in Computer Science & Engineering (CGPA: 7.48/10)</i>	Nov 2022 – Jun 2026 <i>Bhubaneswar, Odisha</i>
Madhusudan Sarvodaya High School (Bihar State Board) <i>Senior Secondary (Class 12) – 75.40%</i>	Apr 2021 – Mar 2022
Navyug Vidyalaya (CBSE) <i>Secondary (Class 10) – 71.33%</i>	Mar 2018 – May 2019

Courses and Skills

- **Programming Languages:** Java, C, C++, Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST API, JSON
- **Core CS Subjects:** Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Software Development Life Cycle (SDLC), Operating Systems
- **Database:** SQL (Queries, Joins, Constraints, Indexing), MongoDB (NoSQL)
- **Developer Tools:** GitHub, VS Code, IntelliJ IDEA, Eclipse
- **Soft Skills:** Team Collaboration, Problem-Solving, Adaptability, Time Management

Academic & Technical Projects

Bash-Based System Maintenance Suite – Linux Automation Project

- Developed a **Bash scripting suite** to automate system backup, updates, and log monitoring in Linux environments.
- Implemented **automated backups with retention policies** and a **real-time log monitoring system** for detecting critical events.
- Designed an **interactive CLI menu** integrating multiple scripts with **error handling and logging** for reliability.

DeepVision AI – AI-Powered Conversational System

- Developed an **AI-powered conversational system** capable of understanding and responding to **user queries**.
- Designed logic for **context-aware response generation** to simulate intelligent assistant behavior.
- Focused on **problem-solving, software logic design, and scalable application structure**.

Voice Automated Car – Embedded Systems Project

- Designed a **voice-controlled robotic car** using **Arduino UNO** and **Bluetooth communication**.
- Implemented **motor control logic** and **voice command processing** for real-time movement control.
- Integrated **ultrasonic sensors** for **obstacle detection** and safe navigation.

Certifications

- AI/ML for Geodata Analysis – Indian Institute of Remote Sensing (IIRS), ISRO

Achievements

- Solved 200+ DSA problems on HackerRank and GeeksforGeeks covering arrays, strings, and sorting algorithms.
- Active volunteer in National Service Scheme (NSS), contributing to social and teamwork activities.
